

Telehealth Solutions SurgeryPod

How does it work?

SurgeryPod uses unique technology to securely and accurately record your measurements and responses keeping your key information up-to-date. This information is automatically and immediately saved to your personal records.

Why should I use it?

SurgeryPod maximizes time spent with your GP as the routine questions and measurements that are taken will be available to him/her as soon as your session is completed.

You can take control over your health and track your progress using SurgeryPod e.g. weight management

When should I use it?

You don't need an appointment to use it - so you can use it at a time that suit you.

Always make an effort to use it prior to your face-to-face consultation to maximise discussion time with your GP.

Simple to use:
Just follow the onscreen instructions.
